Cimetrix SOLUTIONS

COMPANY PROFILE

2019

- INFRASTRUCTURE SOLUTIONS
- CYBER SECURITY CONSULTING
- MANAGED SERVICES
- PROJECT MANAGEMENT

MISSION STATEMENT

To enable value creating technology solutions across all industry verticals.

VISION

To be the most innovative Technology Company trusted in providing competitive solutions and expertise that is always driven by client requirements.

MISSION

We build trust and teamwork to collaboratively develop strategic ICT initiatives while striving for technical leadership in our support services and customer communities.

1. INFRASTRUCTURE SOLUTIONS

- Datacentre design and implementation.
- Network Design and implementation.
- Virtualization and storage solutions.
- Systems Engineering Services (Windows, UNIX, Linux)
- Network Security solutions (i.e. Firewalls, Hardware Security Modules, and NAC).
- Supply of Printers, Point of Sale machines and other auxiliary ICT technologies.

2. CYBER SECURITY CONSULTING

As Cyber Security Consulting specialists we believe security should be accessible to everyone. We also understand that every organisation has its own shape, size and security needs; we will not take a cookie-cutter approach to your business. Our solutions are tailored to suit your business risk needs and budget.

Our technology-agnostic senior consultants are here to help you traverse the gap between information security and business management. Some of the key areas are as follows:

- Vulnerability Assessment Services
- Penetration Testing Services
- Application Security Testing Services

3. MANAGED SERVICES

Our managed security services provide you with unparalleled security intelligence and situational awareness across your security posture. Our highly experienced global teams are skilled up, agile, analytical – continuously challenging the status quo – and scalable. We do this seamlessly through our Cyber Security Operations Centre (CSOC) and Security Operations (SECOPS) divisions, working integrally with our Cyber Defence team.

4. PROJECT MANAGEMENT

Cimetrix Project Management Services help maximize efficiency and accelerate deployment of the Cimetrix Privileged Access Security Solution by bringing together people, processes, and technology with trusted expertise. The Cimetrix Project Manager serves as a single point-of-contact to facilitate communications and effectively manage expectations throughout the project life-cycle. They provide streamlined access to specific Cimetrix resources to maintain high quality execution, more rapidly resolve problems and avoid risks that may impact the project.
